2.0MP WIRE-FREE DOORBELL

MBD-100

Innovative doorbell with FullHD CCTV camera.

To save battery power, this CCTV camera is activated only when you press the call button or when a motion detector with human recognition is triggered.

Visibility in the dark — over 3 meters.

In Partizan mobile application for iOS and Android, you can watch what is happening in front of CCTV camera, see the guest and talk to him thanks to the microphone and speaker built into the device.

Access from anywhere in the world, even when you are not at home, and no wires!

Wi-Fi connection

20 hours of continuous work without charging

Human detection

Resolution 2.0MP (1920x1080 px)

Microphone and speaker

MicroSD Card support (up to 128 Gb)

Wide viewing angle

IP65 — for outdoor or industrial use

RECOMMENDED ACCESSORY

CHIME

for Wire-Free Doorbell MBD-100

Power via USB.

Wireless connect to MBD-100.

THE KIT INCLUDES: Device • Bracket • USB power cable to charge the doorbell battery • Mounting set

* Micro SD card, power supply and Chime For Wire-Free Doorbell MBD-100 are not included in the kit.

2.0MP WIRE-FREE IP CAMERA

MBC-BULLET

Fully battery-powered outdoor FullHD CCTV camera.

Reliably protected from dust and moisture.

MBC-Bullet switches to active mode only when motion is detected in the frame and when you connect to your CCTV camera in **Partizan mobile application** giving extended time between charge.

And all this without the slightest hint of wires!

Wi-Fi connection

Motion detection

40 hours of continuous work without charging

Microphone and speaker

MicroSD Card support (up to 128 Gb)

Resolution 2.0MP (1920x1080 px)

Wide viewing angle

Excellent vision in the dark

IP65 — for outdoor or industrial use

THE KIT INCLUDES:

- Device • Bracket • Mounting set
- USB power cable to charge the camera battery

* Micro SD card and power supply are not included in the kit.

2.0MP WIRE-FREE IP CAMERA

MBC-CUBIC

Home FullHD CCTV camera that **doesn't need wires!**

Compact, reliable, stylish.

Protected from dust and moisture, can be installed outdoors.

Activation of the Cubic occurs when a human is detected in the frame, which significantly saves the device's power.

Easy to use in the award-winning Partizan mobile app for iOS and Android.

Wi-Fi connection

Motion detection

20 hours of continuous work without charging

Microphone and speaker

MicroSD Card support (up to 128 Gb)

Resolution 2.0MP (1920x1080 px)

Wide viewing angle

Excellent vision in the dark

IP65 — for outdoor or industrial use

THE KIT INCLUDES:

- Device
- Bracket
- Mounting set
- USB power cable to charge the camera battery

* Micro SD card and power supply are not included in the kit.

REGULAR IP CAMERA

When installing any wired camera, it is necessary to **drill a surface for wiring!**

REGULAR WI-FI CAMERA

Even when installing a Wi-Fi camera, the **hole for the power cable is required!**

WIRE-FREE MYERS DEVICES

But when installing wire-free Myers doorbell or cameras, **you don't need any cables!**

WIRE-FREE MYERS DEVICES

No wires — no drilling!
Autonomous operation, easy to install and to change the installation place once needed.

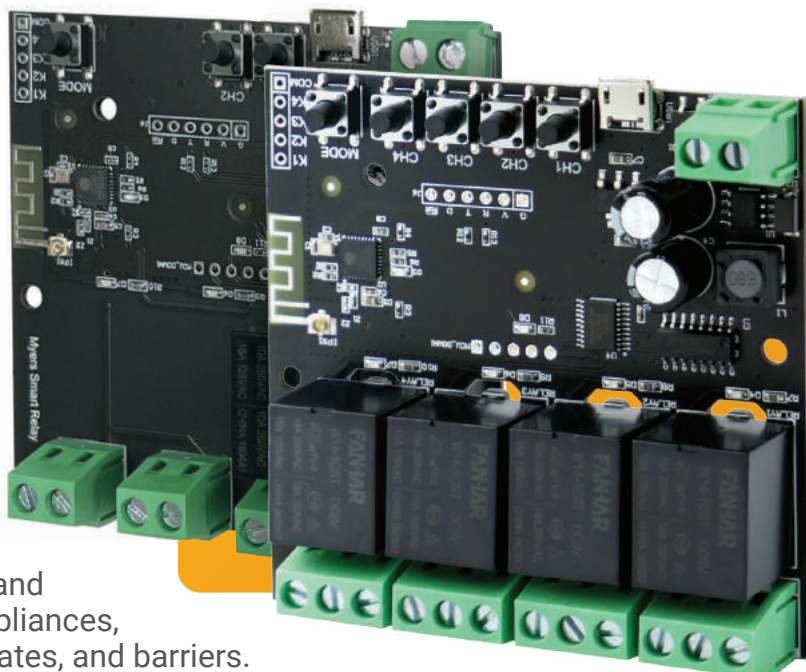

SMART RELAYS

MSR12-4 MSR12-2x2

Thanks to the smart Wi-Fi relays, you can not only see, but also control the access points.

These devices will turn any object into a smart home with controls via **Partizan mobile application** – simple and modern!

Myers MSR12-4 / MSR12-2x2 allows you to control: electromagnetic and electromechanical locks, household appliances, lighting devices, sliding gates, garage gates, and barriers.

Wi-Fi connection

MSR12-4 – 4 independent relays

Custom event schedules

Can be powered by a power bank

MSR12-2x2 – 2 independent relays and 2 alarm inputs

Small size

MSR12-4 WORKING MODES

Inching mode for locks

Self-locking mode for household appliances

Self-locking mode for lighting and electrics

Interlock mode for barriers

Interlock mode for automatic gates

Interlock mode for "Gateway" entrance

MSR12-2x2 WORKING MODES

Inching mode for locks

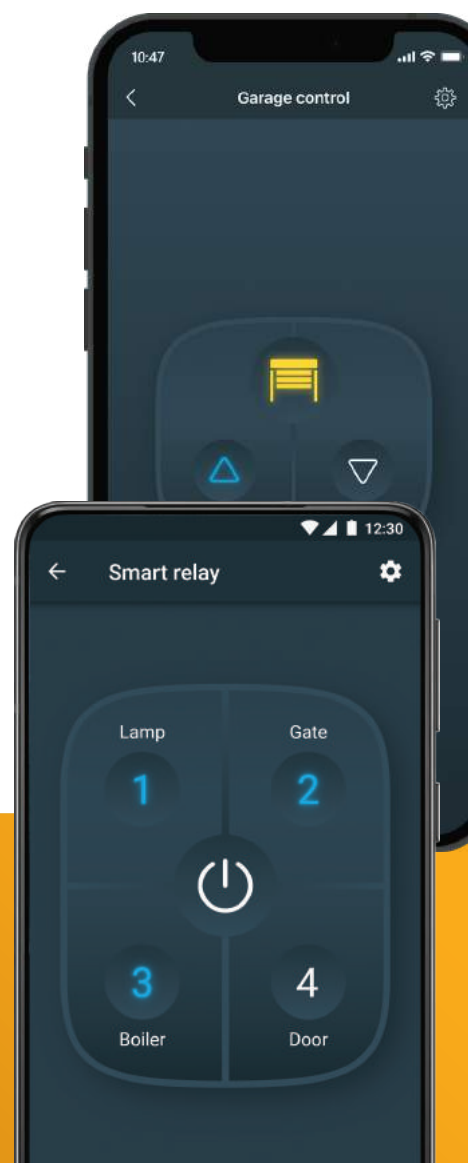

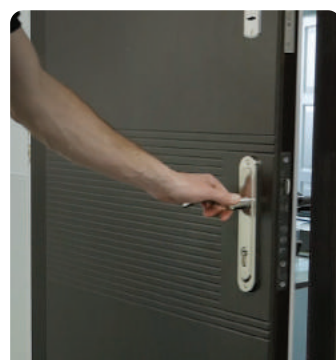

Interlock mode for barriers

Interlock mode for automatic gates

Interlock mode for electric shutters

SMART RELAY

MSR220-1

Universal Wi-Fi relay for intelligent 220V power control via **Partizan mobile application**.

It is plugged directly into the power grid.

The Power Monitoring function allows you to monitor the level of electricity consumption.

Smart relay MSR220-1 is supplied in a housing, this makes the installation process easy.

The device can be **installed without using additional boxes**.

SMART HUB

MSH-ZB

A powerful Smart Hub for connecting of **up to 128 devices** via the ZigBee protocol!

It has stylish housing that will fit well into the interior and will not take up much space.

It works well with **Partizan mobile app**, using which each individual sub-device can be controlled.

WHAT CAN BE CONNECTED TO MSH-ZB SMART HUB? ▼ ▼ ▼

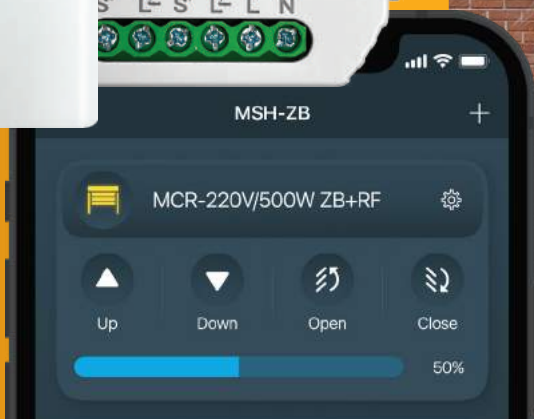

SMART CURTAIN SWITCH

MCR-220V/500W ZB+RF

Specifically designed to control window blinds and automatic curtains.

This compact device will be a great addition to the convenient management of your home or office.

You can do this using **Partizan mobile application** or MRC-RF remote control. Convenient, in any case!

SMART LIGHT SWITCH

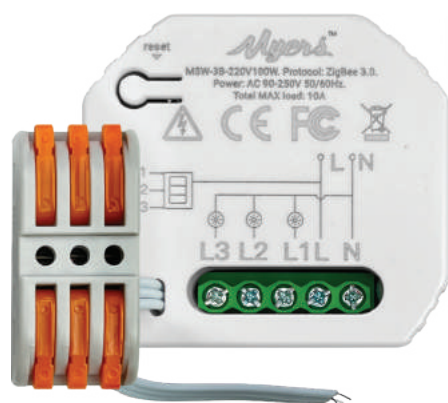

MSW-2B-220V/100W ZB

Designed for lighting devices with brightness control of each with 2 channels.

It can be hidden in the wall during installation, or you can use it with a switch panel.

In the first case, you can control the device only via **Partizan mobile application**.

In the second case, you can additionally use keys and dimmers.

SMART LIGHT SWITCH

MSW-3B-220V/100W ZB

It is similar to the previous device but without the dimmer function.

However, MSW-3B-220V100W has 3 channels, so you can control three electrical devices or lighting points with it.

Control can be done with the classic switch keys, or in a more convenient way with **Partizan mobile application**.

Spring terminal for three cables in the kit.

SMART TEMPERATURE/HUMIDITY/LIGHT SENSOR

MSS-THL1-ZB

A multifunctional sensor for maintaining the perfect ecosystem within a smart home.

It allows you to monitor temperature, humidity, and light levels.

It features a large informative display.

Additionally, the calculated parameters can be monitored on your smartphone using the **Partizan mobile application**.

MSS-THL1-ZB — an important source of data for the rest of your Myers smart home devices to control your curtains, heating and other systems!

ZigBee is a wireless data transfer standard. It is better for using a large number of devices.

SMART ELECTRIC HEATING THERMOSTAT

MHS-ET1-WF

Electric Heating Thermostat MHS-ET1-WF manages your autonomous heating system by connecting to the relevant electric boiler.

Smart boiler thermostat controlled via Wi-Fi using **Partizan mobile application**.

Program your individual heating schedule, set the timer, and remotely change the temperature at home.

The device has a stylish appearance and will look good in any interior. Real game changer for responsible and efficient energy consumption!

SMART WATER/GAS BOILER HEATING THERMOSTAT

MHS-WT1-WF

Smart Heating Thermostat MHS-ET1-WF enables you to control your independent heating system by connecting it to the appropriate gas boiler.

This intelligent boiler thermostat can be managed via Wi-Fi through the **Partizan mobile app**.

Customize your heating schedule, adjust the timer, and modify remotely the temperature within your home.

With its sleek design, this device complements any interior decor. It's a revolutionary tool for promoting responsible and efficient gas usage!

SMART THERMOSTAT RADIATOR TEMPERATURE CONTROLLER

MHS-RC1-WF

Smart thermostat radiator for heating control via WiFi using the **Partizan mobile application**.

With this device, you can create your own personalized heating scenarios and conveniently save on expenses.

Adjust settings anytime, program heating schedules, and integrate with other smart home system components.

The device also features an LED interface for manual setting.

SMART POWER METER

MPM-220V60A-1-WF DIN

This Smart Power Meter is compatible with the **Partizan mobile application** and allows for precise measurement of electricity consumption in kilowatts.

Users can also easily set electricity usage limits, such as when renting out property.

The device is highly protected against power surges.

Connection to a smartphone is made via Wi-Fi.

Simple and convenient installation is achieved using a DIN rail.

Euro Plug Socket

SMART DOUBLE PLUG

MSP-2UK

Twice as much benefit with one smart device!

Even three times, because MSP-2UK is equipped not only with **two 220 V** sockets, but also with a **USB port**.

You can use each plug separately, controlling them via **Partizan mobile application** or using the buttons on the housing (the USB port works constantly).

The device supports a timer and on/off schedule functions.

MSP-2UK looks like an elegant wall panel, so it will fit well into the interior.

Attention, the device uses a UK Plug Socket!
