Precautionary measures

- Do not connect the controller to the power supply from unstabilized power, this can lead to fire, electric shock or other hazards.
- Power supply and operating temperature must correspond the performance requirements of the product.
- Do not install the controller near a radiator or heaters.
- Do not use the controller without lightning protection equipment.
- The manufacturer is not responsible and will not reimburse damages for defects caused by the fault of the consumer at non-compliance with the rules of operation and installation.
- Do not attempt to repair, as this will void the warranty. If you have any fault, please contact your dealer or certified service center.
- Be sure to read the conditions of the warranty services that are included.
