Smart Function Algorithms Enabling

You can enable Smart Functions by going to the tab “Main menu” => “Alarm” => “Intelligent Alert”

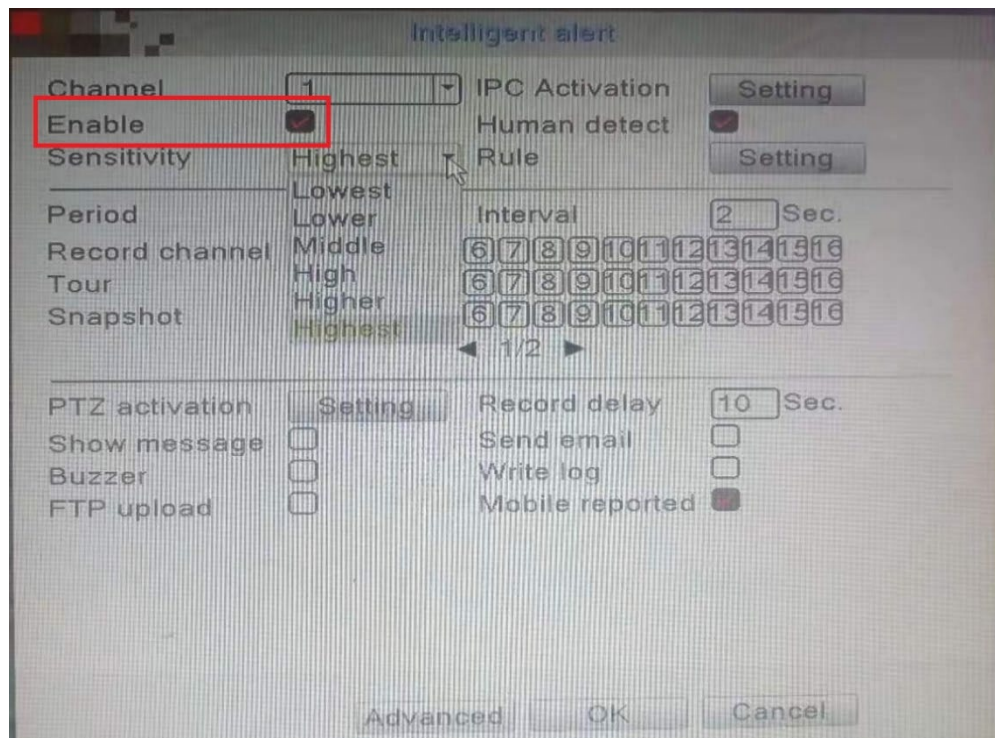

To activate this function you need:

1. Select channel

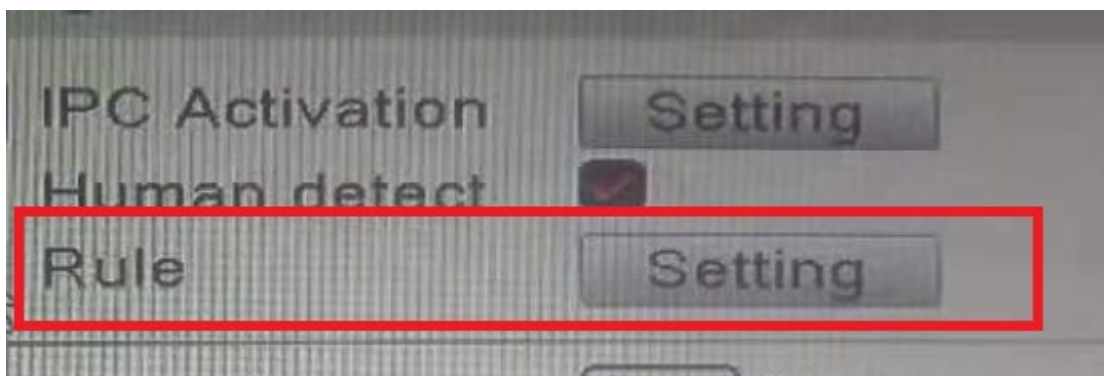

2. Check "Enable" box

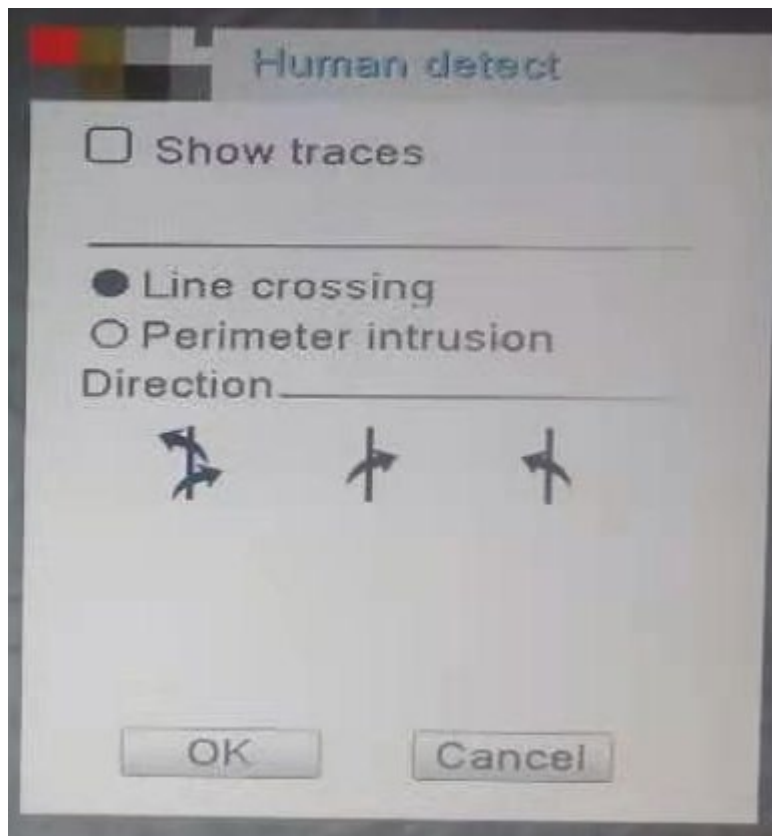

3. Activate «Human detect» mode

4. Select preferred algorithm in "Rule" settings

The following analysis algorithms are available

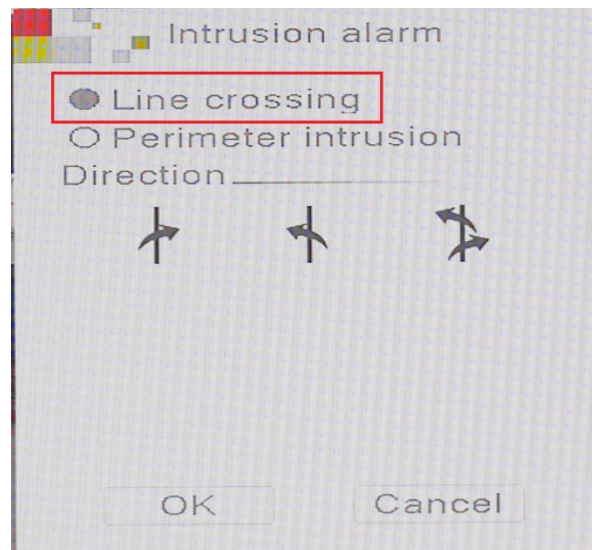

Line crossing – crossing of the line

Perimeter intrusion – watching the area

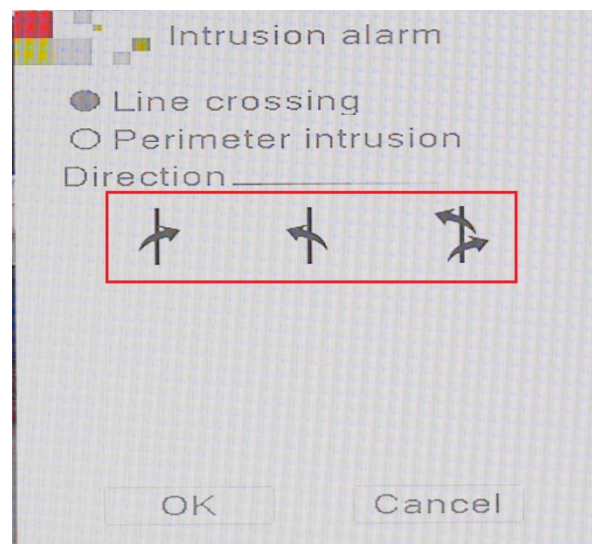

Algorithms Description

1. Line crossing – crossing of the line

To activate the "Line crossing" checkbox must be checked in the "Line crossing" field

Then select alarm activation rule

crossing the line from left to right

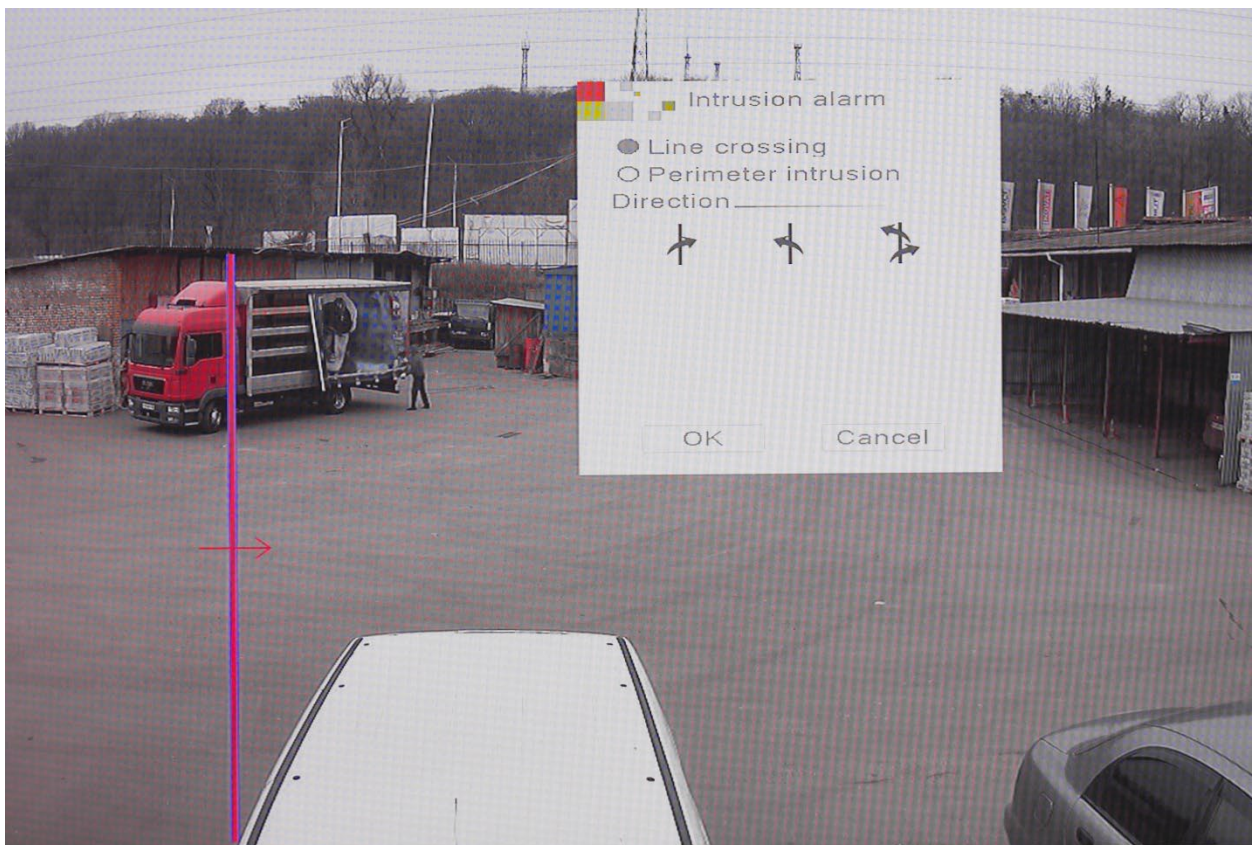

crossing the line from right to left

crossing the line in both directions

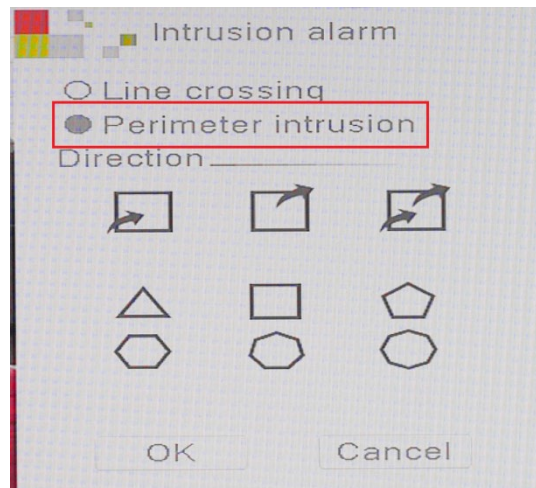

Set a line of intersection on the screen using the mouse manipulator.

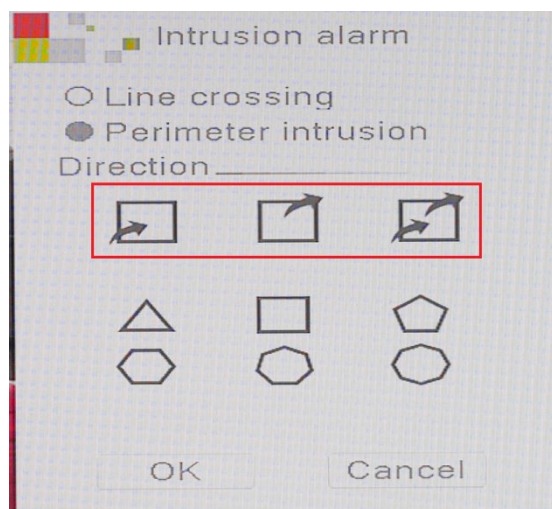

Upon completion, click "OK" to save the rule.

2. Perimeter intrusion – perimeter crossing

To activate the " **Perimeter intrusion**" checkbox must be checked in the " Warning Area " field

Then select alarm activation rule

area penetration alarm

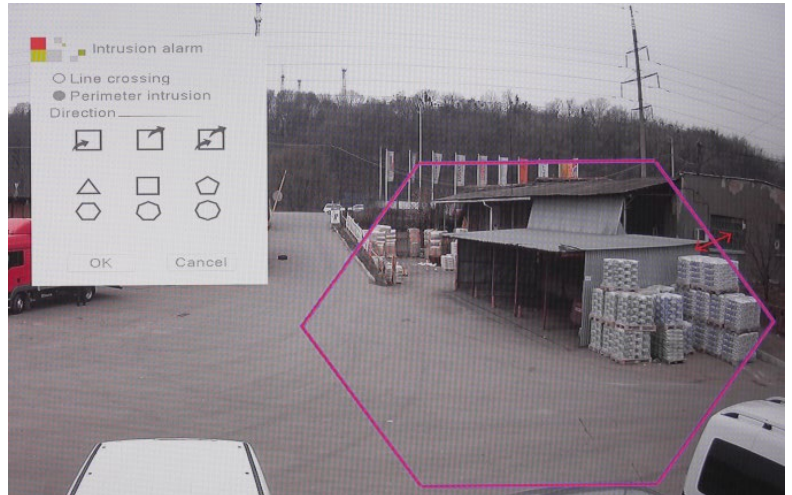

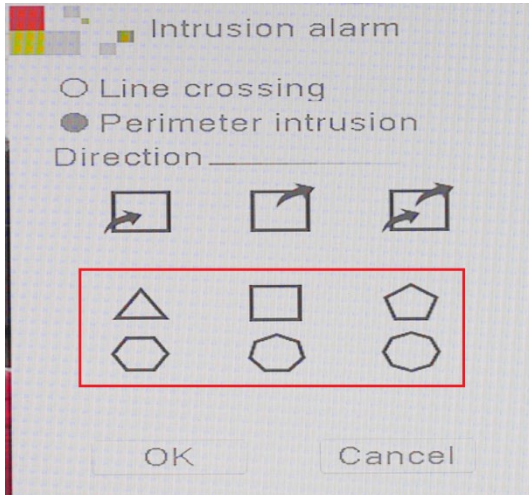

leaving the area alarm

area penetration or leaving alarm

Then select the area type (6 options are available) and apply it to CCTV camera

Upon completion, click "**OK**" to save the rule.
