1. How to start

This device supports **Partizan Cloud Storage** service and **Partizan** mobile application for iOS and Android.

Partizan Cloud Storage benefits:

Your data cannot be stolen or damaged.

No one can access your devices, live and archived video without your permission.

Access to your account and devices from anywhere in the world. Even mobile Internet is enough.

Partizan app won "**Best Mobile Video Surveillance App 2019**" international award.

To take full advantage of the device, **install Partizan mobile application** for iOS or Android:

Partizan mobile application for iOS:

<https://apps.apple.com/app/partizan/id1473001227>

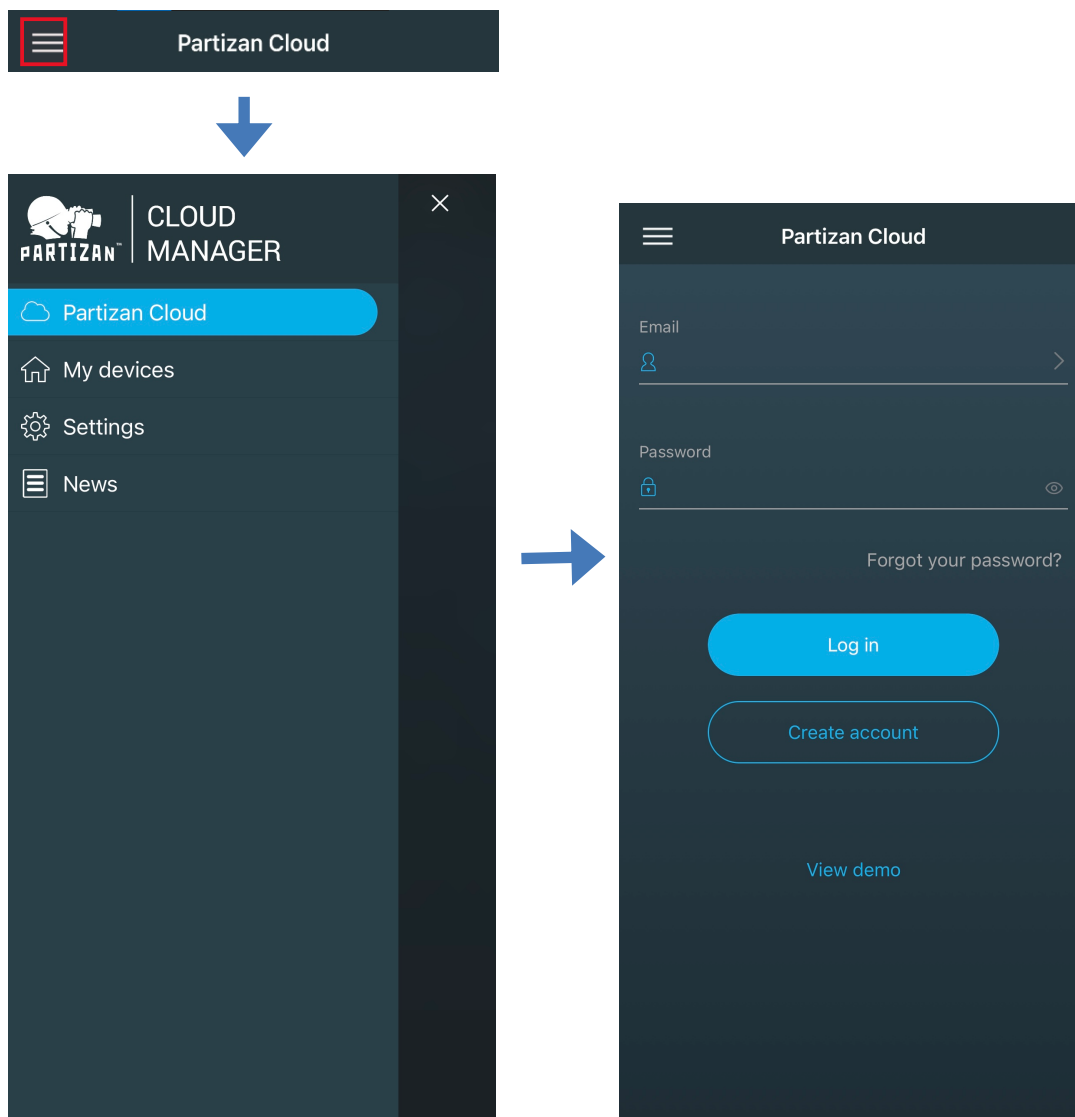

Partizan mobile application for Android:

<https://play.google.com/store/apps/details?id=com.partizan.pro>

To work with this device you need to **sign in to your cloud account**.

Open the app, use an **existing account** or **create a new one**:

After signing into the cloud account you can go directly to device setting.

Select «Smart relay» device

To work with this type of device, you must **log in to your cloud account**. Use an **existing account** or **create a new one**.

Enter the registration data of your Wi-Fi network (name and password) to which the mobile phone is connected. **The network standard must be 2.4GHz!**

Press «Next».

Switch the device on.

×

Wireless Connect

Make sure that your mobile device is using the 2.4GHz Wi-Fi network. Wireless cameras do not support the 5GHz standard.

To choose another network please check the Wi-Fi settings of your mobile device.

Enter the network password.

Wi-Fi network

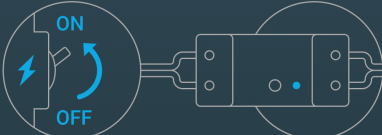

Wi-Fi password

NEXT

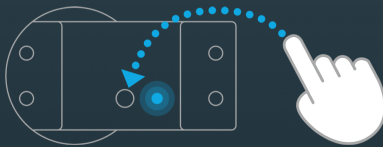

×

Wireless Connect

Please, turn on your device and wait for the device to boot up for 10 seconds.

Check the blue LED, if the LED is not blinking or blinking slowly hold the reset button for 10 seconds to reset the device.

Once the blue LED is blinking fast, click "Next".

NEXT

Wait 10 seconds for the device to boot up. Hold down one of the power buttons for 10 seconds to reboot your device. If the blue LED blinks slowly, reboot the device again. Once the LED starts flashing blue quickly, press “Next”.

The plug will receive the registration data of your Wi-Fi network and will automatically be added to the list of devices in your cloud account.

4. Setting the operating modes in Partizan mobile application

To proceed to setting the operating modes in Partizan mobile application, select a plug in the list of added devices.

4.1 Control Screen

On this screen, you can turn off/on each of the two plugs, as well as go to the Settings Menu

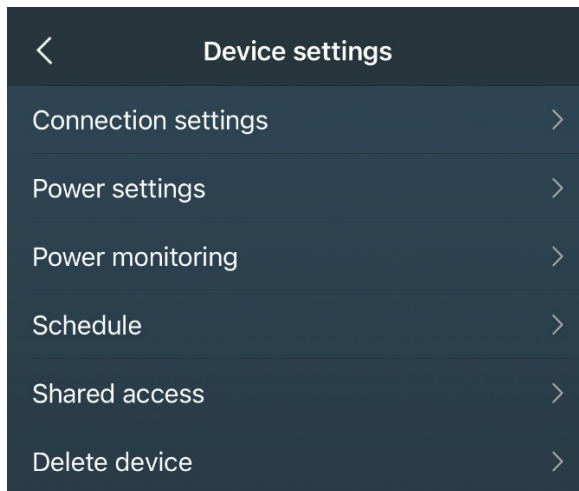

- Plug On/Off.

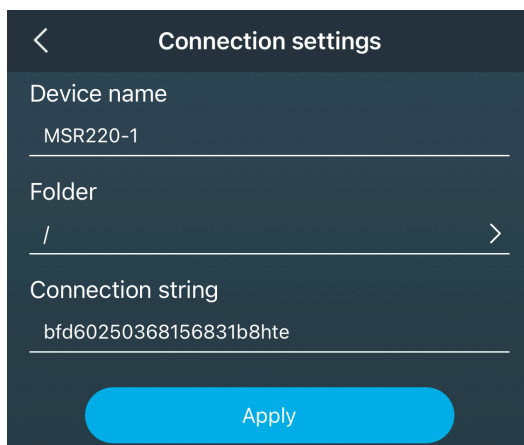

- Settings menu.

4.2 Settings Menu

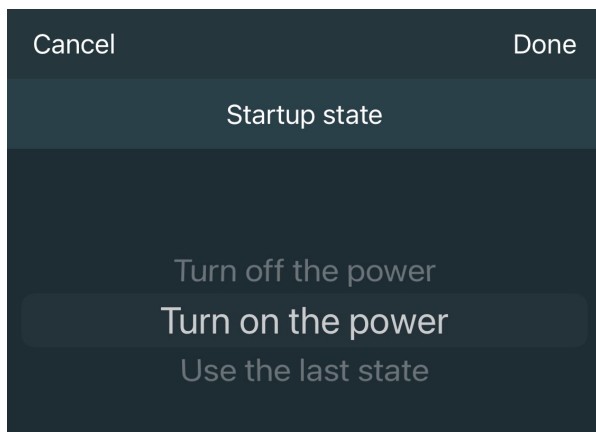

4.3 Connection Settings

In this menu, you can give a name to the device or view the connection ID.

4.4 Power settings

A smart plug, when power is restored after it is turned off (for example, emergency), can be configured to activate in one of three modes.

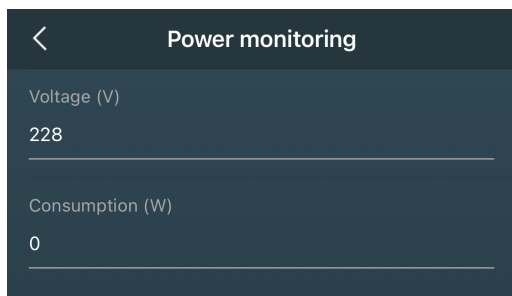

Turn off the power - after the power supply is restored, the plug will be turned off.

Turn on the power - After power is restored, the plug will be turned on.

The last state - after the power supply is restored, the plug is activated in the state that was set before the power failure.

4.5 Power Monitoring

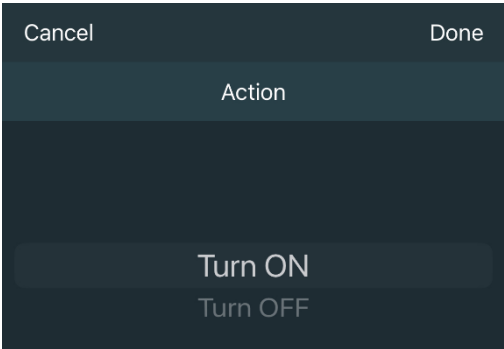

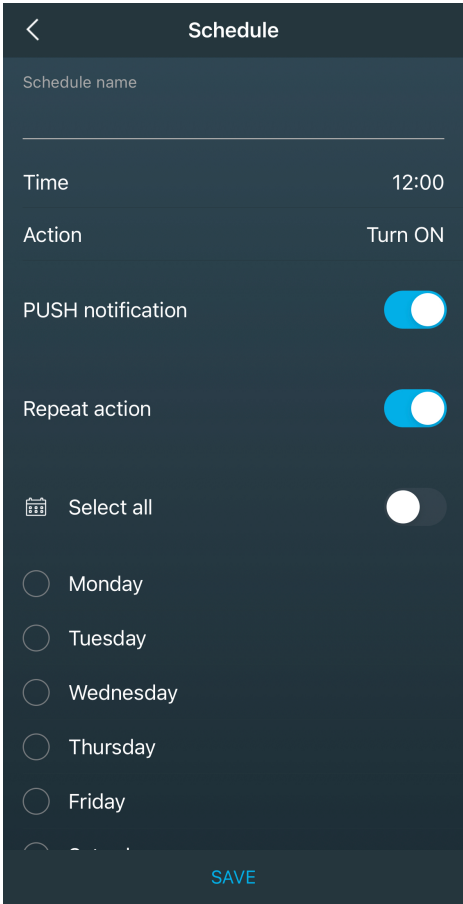

Displays Current Voltage and Consumption.

4.6 Schedule

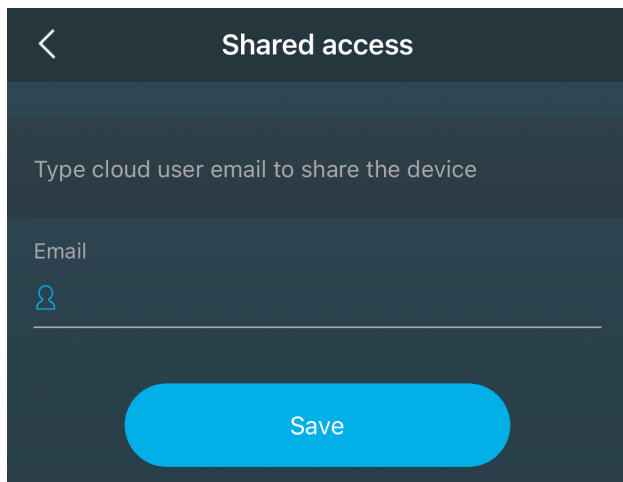

By clicking on the “+” a menu is displayed where you can give a name to the schedule, select the duration of the action, the action itself (Disable or Enable). You can receive notifications about the schedule on your mobile device. The schedule can be made recurring.

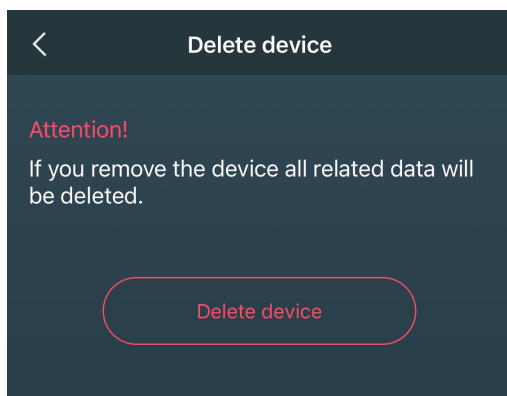

4.7 Shared Access

To share access to the device with another user, you must enter his e-mail registered in Partizan Cloud.
